

Avoid the glaringly obvious

Project

This particular client has enclosed an existing courtyard with the addition of a simple glazed 'lantern' type structure with both vertical glazing 600mm high as well as a fully glazed & hipped roof.

Traditionally the shading would have been resolved using standard pleated or pinoleum blinds but in this case the client did not want blinds that stacked at the base of the roof but needed something that went completely out of site when not required.

Solution

Grants shading offered a simplistic roller blind' solution that would operate around a relieving roller bar sited, at the corner and stack back within a purpose built blind box situated at the cill

Specification

8 X Endurashade roof roller blinds made using Soltis sunscreen mat rial in colourway grey/white. Heavy duty purpose made bracketry to support roller bar Somfy motorization, Radio remote handset contols
